

# Valdez COVID-19 Unified Command

## NEWS RELEASE # 018

For immediate release: 08/20/2020, 8:00 p.m.

**Valdez, AK** – The community of Valdez received confirmation of one new resident case of COVID-19 on Thursday.

The new resident case is an adult with mild symptoms. They have been in isolation at home since the onset of their illness. They are following the guidance of their medical provider and public health officials. The contact investigation for this new case is ongoing, with close contacts anticipated to be notified by Friday afternoon.

The Valdez community must continue making thoughtful and careful decisions as long as COVID-19 remains present in Alaska and beyond. Taking individual actions like hand hygiene, physical distancing, wearing a cloth face covering around others, keeping your social circle small, and staying home when you are sick all make a big impact towards keeping our community safe.

Please continue to monitor yourself for COVID-19 symptoms which include a fever, cough, sore throat, difficulty breathing, loss of taste or smell, and any new onset of illness. If you believe you have even mild symptoms, contact your healthcare provider for screening and closely follow their instructions. Remember to call ahead before you go to the doctor’s office, public health clinic, or hospital. The local medical team will continue to provide the best possible care for you and our community.

Asymptomatic testing is currently available in Valdez for select high risk populations, including those who interact with the public at work, those with state of Alaska travel vouchers, and those who need pre-procedure testing. If you feel you may have been exposed to someone with COVID-19, please contact your medical provider for guidance. Timeline for testing will vary depending upon your possible exposure date. Visit [www.valdezak.gov/COVID-19](http://www.valdezak.gov/COVID-19) for additional information and to learn more about different local testing options.

The Valdez Unified Command and public health officials continue to closely monitor the rapidly changing course of COVID-19. We ask the community to practice compassion and remember that behind every case count number is a person dealing with a difficult diagnosis. We remain committed to providing information, support, and resources to protect the health of Valdez.
